FINANCIAL SECTOR REVIEW

The Nigerian financial services industry comprises of Banks and Non-Bank Financial Institutions. These include Finance Companies, Primary Mortgage Institutions, Microfinance Banks, Insurance Companies, Bureau De Change, Investment Banks, Financial Technology Companies

Nigeria is the leading economy in Africa. It has a population exceeding 200 million. The Country's Gross Domestic Product (GDP) declined between Q4 2021 and Q1 2022 from 3.98% to 3.11%. However, The Q1 2022 growth rate was higher than the 0.51% growth rate recorded in Q1 2021 by 2.60% points. The Financial Sector of the Economy contributed 3.8% to the GDP. The Sector grew at a rate of 32.29% which was greater than the rate of Q1 2021 at 30.14%.

The Oil benchmark for the year 2022 budget is \$62 per barrel and 1.88 million barrel per day. This compares well with the current selling price of Oil which is above the benchmark (*\$88 as at August 27th, 2022 according to oilprice.com*).

'The CBN after the Monetary Policy Committee meeting on May 25th, decided to raise the Monetary Policy Rate (MPR) for the first time since October 2020 from 11.5% to 13.5%. In a bid to further curtail inflation, the CBN increased the MPR to 14% in June. This could have the effect of limiting borrowing from Financial Institutions due to the high costs and lead borrowers to find alternative sources of Finance. Currently, the official Exchange Rate to the dollar as at 8th September, 2022 is N424.8 while the exchange rate at the parallel market stood at N702.

The General Inflation Rate as at the month of June 2022 is 18.6% which is higher than the previous month figure of 17.71% in May.

The *Group's* operation is largely in the Financial Services Sector. Consequently, improvements in the economy particularly in the Non-Oil sectors will support the *Group's* ability to generate Revenue.
